

Welcome

Welcome to the CELONIS Help Portal!

This will provide you with manuals of all Celonis products.

If you encounter any problems, do not hesitate to contact our Servicedesk.

Celonis

Celonis utilizes the fact that every interaction with your databases leaves digital traces. The Celonis application runs process mining algorithms to reconstruct the actual processes in real-time. The user gets an intuitive visualization with a powerful graphical analytics interface through which he can analyze the process. Celonis is successfully used to improve process costs, quality and also compliance.

Celonis 4.7

This manual is designed for Celonis 4.7. It focuses on Stability, Performance, Advanced PQL Functionalities and Process Visualizations as well as User Experience.

[Manual 4.7 \(EN\)](#)

PQL is the language within Celonis Process Mining, that allows to translate business questions into executable queries on the Celonis Analytics Engine. Find an overview for all supported statements here.

[PQL Function Library 4.7 \(EN\)](#)

The installation guide shows you how to install Celonis 4.7

[Installation Guide 4.7 \(EN\)](#)
